Midjourney To Introduce Personal Models, v7 Upgrade Soon
14 hours ago
The key feature: user-specific models. By analyzing preferences from image ratings, Midjourney aims to tailor image creation and overcome model biases. Version 7 also boasts faster processing and improved aesthetics.

Daily Digest: This sounds real
bensbites.beehiiv.com · 16 hours ago
What does this mean? This new model, named Voice Engi recreate anyone's voice from just a 15s audio sample. And speech sounds like the real deal.

🖥 **Stargate**
20 hours ago
Interestingly, the name "Stargate" is a nod to the 1994 sci-which features an ancient portal that leads to a far-off wo

> **Midjourney Set To Introduce Personalized Models, v7 Upgrade Coming Soon:** Midjourney revs up its AI art engine with personalized models in v7 (due in 3 months). Founder David Holz promises better image quality, faster prompt understanding, and video generation by year-end. The key feature: user-specific models. By analyzing preferences from image ratings, Midjourney aims to tailor image creation and overcome model biases. Version 7 also boasts faster processing and improved aesthetics. Looking ahead, Holz hints at video and potentially 3D model generation, acknowledging the need to improve prompt understanding, an area where competitors like DALL-E and Ideogram currently lead. Read more.

Now I can leverage Search & AI

Work with Smart Connections AI on my insights ...

Based in recent notes in folder S01 Personal/030-039 Areas/32 Zettelkasten/Literature notes/Matter what are my key insight about AI?

Based on your notes, your key insights about AI (Artificial Intelligence) include:

- The importance of data quality, as highlighted by the principle "Garbage in/Garbage out," emphasizing the need to discern what constitutes valuable data for AI processing.
- The necessity of a supportive culture for effective AI implementation, suggesting that an agile mindset is beneficial when introducing AI technologies.
- The observation that AI requires more intelligent human operators as simpler jobs are automated, indicating a shift in workforce skills and roles.
- The impact of AI on increasing pressure on bottlenecks within systems, necessitating a better understanding of the Theory of Constraints (TOC).
- The interdependence of technology and culture, where each influences and shapes the other.
- The potential of Generative AI (GEN-AI) to significantly reduce user interface (UI) complexity by supporting work processes and handling complexities behind the scenes.
- The prerequisites for companies to be cloud-ready and agile to leverage AI effectively.
- AI's role in fostering closer collaboration by eliminating administrative
