What is each dot?

swipe →

[illegible]

swipe

Dot size reflects the amount of connections and indicates importance

How might AI leverage and extend that?

swipe

It enables serendipity and provides me with new connections and reminds me of connections

My note

My running list of 12 favorite problems

How can I extend my nutrition with healthy elements without at the same time harming the environment?

How can I help others to grow & learn fast and leverage my knowledge and build on what I learned over the years?

How can I grow a permaculture based garden where I flourish with being in flow while thinking about topics?

How can I find a good balance of learning topics that make sense to get capable of and at the same time leverage technology and already existing knowledge?

- How can I establish my OKR habit - How can I consistently achieve the goals I set for myself?
- What facets of my life can I automate?

How can I grow my wealth to a level that I can think and act independently and at the same time stay connected, social and caring?

- How can I generate income pursuing my interests?

How can I hold a good connection with all my children and help with their growth and at the same time ensure that they stay highly engaged, with their curiosity?

How can I stay financial self managed and incorporate best knowledge to create a compounding income, leveraging advantages of tax management?

Smart Connections for Obsidian

✓ Talked to sync.smartconnections.app ▾

Based on the notes from the "S01 Personal/030-039 Areas/32 Zettelkasten/Literature notes/Matter" folder, here are five different sources that potentially connect with your "12 Favorite Problems" and a potential new connection:

1. **Why The Impact Effort Prioritization Matrix Doesn't Work:** This note discusses the Planning Fallacy and the tendency to underestimate risks and overestimate benefits of actions. It emphasizes the need for prioritization and experimentation to find valuable projects. This could relate to problem-solving and decision-making processes in your list of favorite problems, highlighting the importance of realistic planning and risk assessment.
2. **The Power of Systemic Coaching in Change Management:** Systemic Coaching is mentioned as a method that aligns individual actions with broader organizational objectives. It could be connected to problems related to managing change or personal development, as it focuses on holistic approaches and acknowledges the interconnectedness of systems.
3. **Thriving in an Age of Continuous Reinvention:** This note addresses the inefficiencies in routine activities and the transformative potential of AI, including generative AI. The focus on continuous reinvention and embracing technological advancements could relate to your favorite problems, especially if they involve innovation or adapting to change.
4. **The Future of Education is Community - The Rise of Cohort-Based Courses:** This note discusses the evolution of online learning, emphasizing the importance of community, accountability, interaction, and impact in learning. If one of your favorite problems involves education, learning methods, or community building, this note provides valuable insights into modern educational practices.

Even curious about the new connection?

swipe

Yes! I'm up for that next step ... What about you

Potential New Connection: A new connection might be exploring how systemic coaching and continuous reinvention principles can be applied to personal development and organizational change management. This could involve integrating insights from AI and technological advancements into coaching practices and learning methods, fostering a culture of innovation and adaptability.
